

Copy the following poem or mini-book on white or yellow paper. Students may write about the stages in the life cycle of a pumpkin and illustrate each page.

Consider having younger students copy short sentences from the board. Older students can write their own sentences to tell about the life cycle of a pumpkin. Each child will need several copies of the lines or one copy of each of the booklet pages. Staple completed pages behind the booklet cover using two staples at the top of the book. Glue the back page to the pumpkin or staple the booklet to the craft.

Pumpkins

When you see me in the fields,
My orange glowing in the sun,
It's time to say goodbye to
summer,
And hello to autumn fun!

Pumpkins

When you see me in the fields,
My orange glowing in the sun,
It's time to say goodbye to
summer,
And hello to autumn fun!

Copy on white or yellow paper. Students can illustrate the blank cover.

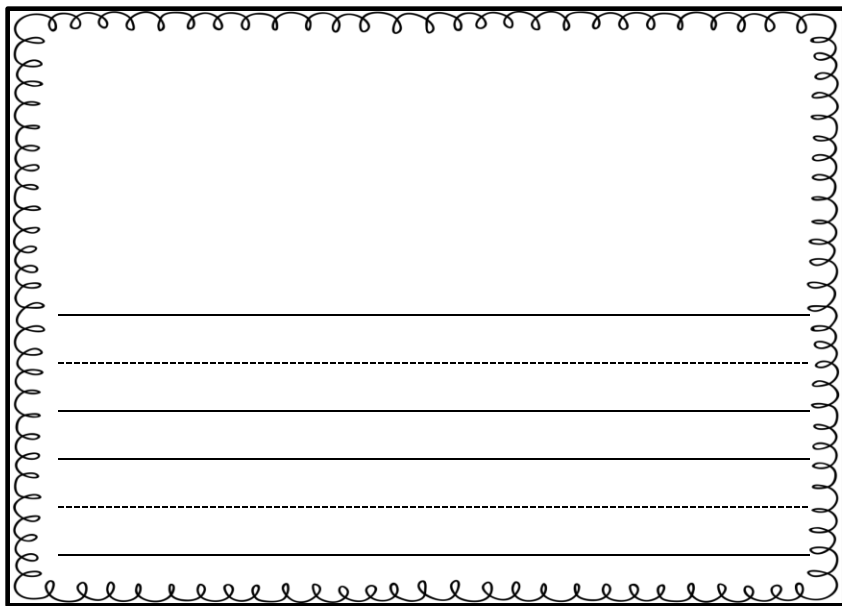

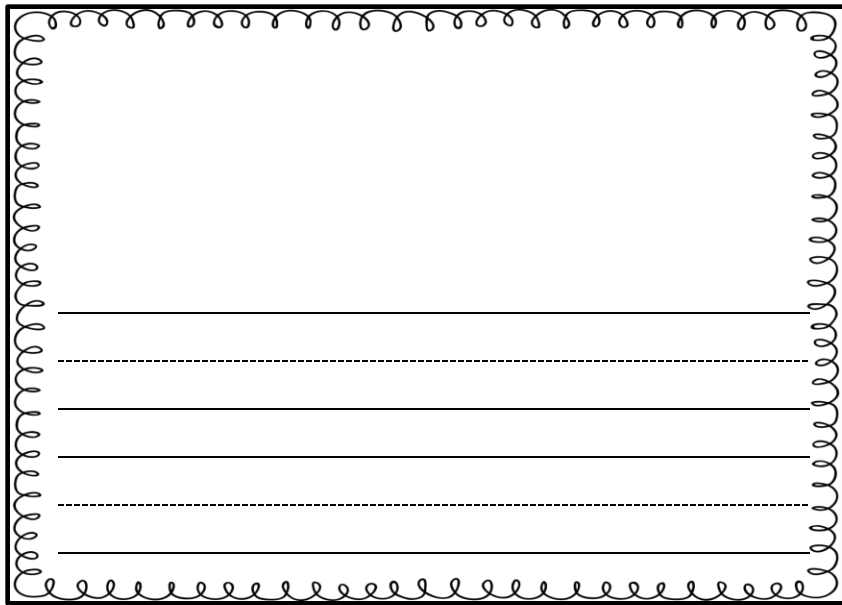

The Life Cycle of a Pumpkin

The Life Cycle of a Pumpkin

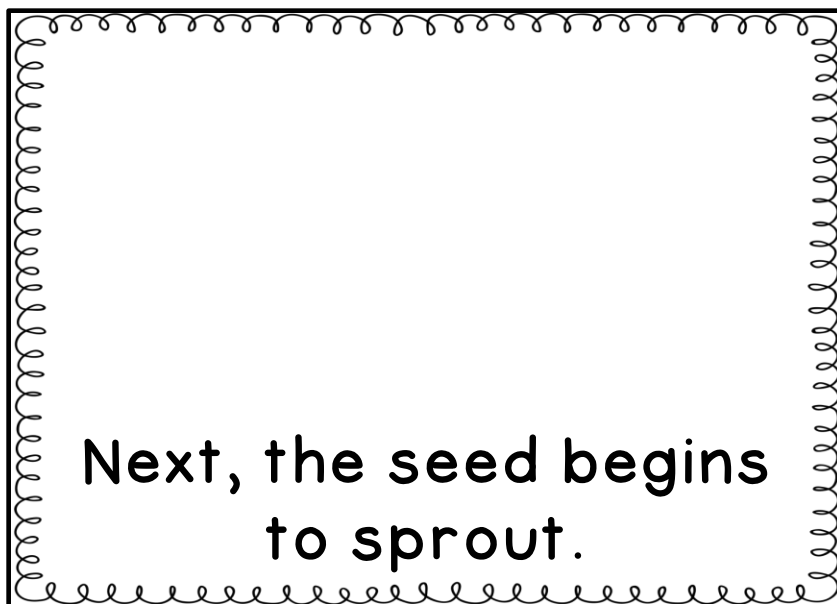

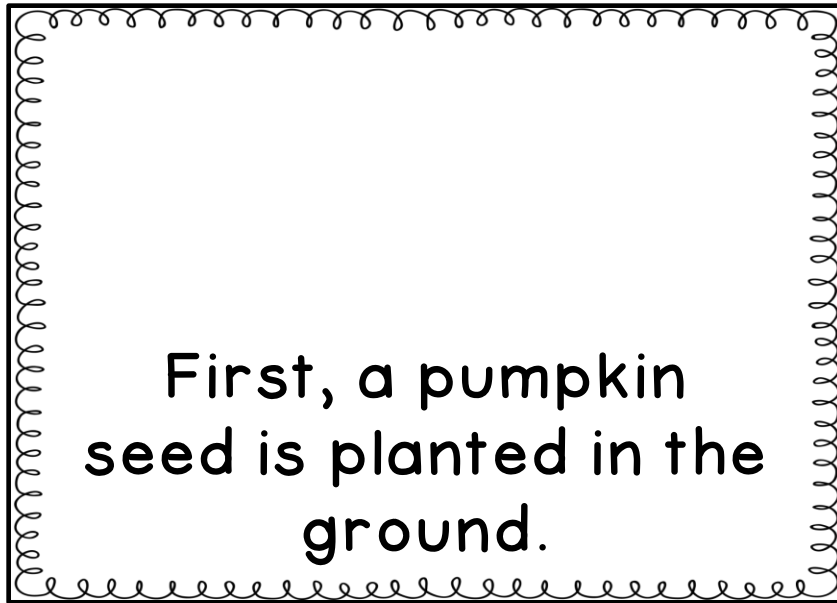

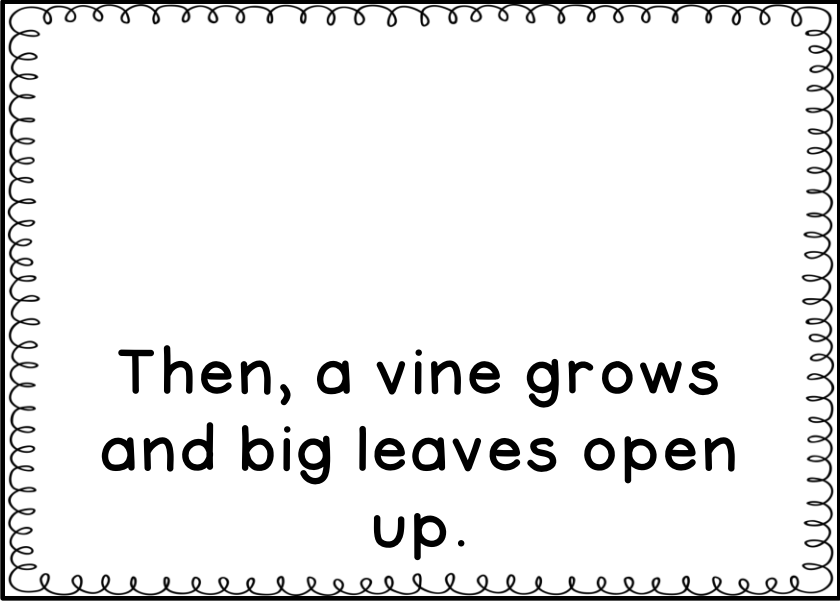

By _____

Copy the following mini-book pages on white or yellow paper. Students illustrate each page. Staple behind the booklet cover using two staples at the top. Glue the back page to the pumpkin or staple the booklet to the craft.

Then, a vine grows
and big leaves open
up.

After that, a yellow
flower blooms.

A small green
pumpkin grows
bigger and bigger.

Finally, the green
pumpkin ripens and
turns orange.
